

Codebook List 1 file

The List 1 file is based on question 7 of the [INTEREURO questionnaire](#). The structure was created, updated and coded throughout September 2013 and the Summer of 2015. Some final adaptations were made in the Summer of 2016. This data-file gives a comprehensive overview of all organized interests – identified in the EC-experts interviews, EP interviews, interviews with group representatives, or other sources – that were mobilized with respect to a particular legislative case.

This file was constructed by stacking all the ‘lists 1’ (which were compiled by the researchers before they starting doing an interview with interest group officials; see questionnaire) on top of each other. These lists contained the organizations identified in the media (relevant statements), EC interviews and organizations identified in the interviews with interest organizations.
